

ARE YOU SPENDING A FORTUNE TO HEAT YOUR CLUB ROOMS..?

IS YOUR CLUB LITERALLY THROWING MONEY DOWN THE DRAIN WEEK IN WEEK OUT?

Bill Sharpe-Club Secretary of Coombes Social WMC have had Smart Energy's Low Watt Heating Panels in for just over a year now and his Committee couldn't be happier with the saving's the heaters have made their Club when just heating their concert room area.

"Smart Energy Projects have reduced our electric spends right down within our Club after installing their Low Watt Radiant Panel Heaters within our concert room area. We are now **saving £335 per month** and have a nice even consistent temperature for our members with no more cold spots and draughts. We can heat the area as and when we need too with the controls and the heaters are so much more efficient when compared to using our air-conditioning units. We wouldn't hesitate in recommending any Club to Smart Energy if you have poor heating that is expensive to run."

Do your Club Rooms suffer from cold spots?

- Are you still heating areas with air-conditioning units over 7 years old?
- Do you have to heat your entire Club just for a few room areas?
- Are you having to switch your boiler on at least 4 hours before to get your concert room warm ready for your entertainment to take place.?

Let us show you a Smarter, more Energy Efficient way of heating your Club which is less stressful on the Club's pocket.!

Secretary Bill Sharpe
Of Coombes Social WMC

SAVING £4,020 PER YEAR

Could your club really
afford to say no to
savings like this.....???
