

GET SMART AND START SAVING LIKE Tinshill & Cookridge Club & Institute Club In Leeds

NO NEED TO HAVE YOUR CELLAR COOLER RUNNING 24/7 THROUGHOUT THE YEAR. USE THE AIR FROM OUTSIDE TO SAVE HUNDREDS OF POUNDS EVERY YEAR.

Would It Benefit Your Club To Save Precious Money Each Month And Cool Your Cellar Using The Cold Air From Outside Like Tinshill & Cookridge Club & Institute have been doing For the past few years now.??

TINSILL AND COOKRIDGE CLUB HAVE NOW *SAVED A HUGE £4,048* BY COOLING THEIR CELLAR USING THE COLD AIR FROM OUTSIDE AND STIL CONTINUE TO SAVE YEAR IN YEAR OUT.

Barry Edwards Secretary of Tinshill and Cookridge Club asked Smart Energy to see if we could help their Club reduce their ever-expanding electricity bill. We explained to Barry after performing a Free Energy Management Survey at the Club that the best way to save on their electric spends would be to reduce the costs of running their expensive cellar cooler by cooling their beer using the cold air from outside when below 10 degrees day and night with our FREE AIR CELLAR SYSTEM.

By having this system installed the club would no longer have to pay to cool their beer during the Autumn and Winter months therefore saving hundreds of pounds each year on the Club's electricity spends. Barry and His Committee thought this was a fantastic idea and had the Free Air Cellar System installed straight away and they have been **saving £168.74 a month** on the club's electricity bills over the past few years now.

Barry being a very proactive Secretary for her Club has now turned it around by thinking Smarter with his Committee and always on the look out to save money where ever she can. Barry states, "With the fantastic advice given to us from Smart Energy we will now continue to make saving's each Month without it having to cost our Club anything which is a huge help to us. I would strongly recommend that any Club still using their cellar coolers 24/7 to have an Energy Management Survey done to see how much you too could save."

Depending on the size of your cellar you could potentially save up to £150- £250 per Month, the older the cellar cooler the higher your saving's will be.

COULD YOUR CLUB REALLY SAY NO TO SAVINGS LIKE THIS ????
